Capability summary

Asmae is a Mechanical Engineer specialized in procurement and supply chain with nearly 4 years of experience in industrial purchasing, EPC/EPs contract management, and negotiation. She possesses strong expertise in strategic sourcing, risk analysis, and cost optimization, having contributed to projects in the mining, energy, and automotive industries.

Asmae is proactive and results-oriented, with proven ability to evolve in demanding environments while ensuring the mastery of efficiency and performance. She has successfully managed complex contract strategies, identified and mitigated financial and contractual risks, and led cost optimization initiatives.

With experience across multiple sectors including phosphate mining, renewable energy (solar photovoltaics), and automotive production, Asmae demonstrates comprehensive understanding of global supply chain operations.
